

**NONMAJOR ENTERPRISE FUNDS
DECEMBER 31, 2005**

King County has established Enterprise Funds to account for organizations which are intended to be self-supporting through fees charged for services provided to the public. The County has six nonmajor enterprises that use the accrual basis of accounting. A typical enterprise consists of an operating fund and construction subfund and may also include debt service or other reserve subfunds.

The Institutional Network (I-Net) Enterprise Fund – Accounts for the development and operations of a fiberoptic network which connects approximately 300 public facilities across King County. I-Net provides broadband internet connectivity, including data, voice and video communications to schools in unincorporated King County, public safety agencies, courts, public health facilities, and other public service agencies.

The King County International Airport (KCIA) Enterprise Fund – Accounts for the operations, maintenance, capital improvements, and expansion of the King County International Airport/Boeing Field. With its two runways (3,710 feet and 10,001 feet in length) and four fixed-base operators, KCIA provides all the facilities and services necessary to support jet and propeller-driven aircraft and helicopters. KCIA is an FAA-designated General Aviation Reliever for Sea-Tac Airport and averages over 375,000 general aviation operations per year.

The Radio Communications Services Enterprise Fund – Accounts for the operations, maintenance, capital improvements, and expansion of the 800 MHz trunked radio system that provides communications for virtually all public safety agencies of the County, as well as many other local government agencies. Costs are recovered primarily through user fees, including charges for maintenance and future equipment replacement.

The Sewer Utility Enterprise Fund – Originally established to collect assessments and pay principal and interest on sewer revenue bonds issued in the King County Utility Local Improvement District and the King County Sewer and Drainage District 4. This fund is slated for closure in 2006.

The Solid Waste Enterprise Fund – Accounts for the operations, maintenance, capital improvements, and expansion of the County's solid waste disposal facilities under the Solid Waste Division of the Department of Natural Resources and Parks. The County operates eight solid waste transfer stations, two drop box stations, two household hazardous waste facilities, one regional landfill, and recycling services for residential customers. Operating revenues result primarily from tipping fees at the active solid waste disposal sites, while bond proceeds fund most new construction. Significant reserves are set aside to replace landfills, to provide for post-closure care and remediation costs, and to replace capital equipment.

The Stadium Enterprise Fund – Originally established to account for the operations, maintenance, and capital improvements to the King County Stadium (the Kingdome). Although the implosion and subsequent demolition of the Kingdome took place in 2000, the enterprise fund remains open pending final disposition of the fund's remaining assets.
